

ZEYNAH ENERGY

CYPRUS · SOLAR · STORAGE

FOR INSTALLATION COMPANIES

You do the technical work. We bring the qualified enquiries.

Zeynah builds AI-powered customer acquisition and pre-qualification for solar companies.

This is a starting proposal, not an offer. It states plainly what we can promise and what we cannot.

**Six languages,
around the clock**

TR · EN · EL · DE ·
RU · AR

**Not a name and a
number**

Bill, roof,
ownership, timeframe

No cost up front

Paid only on work
that goes ahead

THE PROBLEM

Your time goes into filtering, not installing

Most enquiries start with questions that have nothing to do with your technical work. And they take hours from your best person.

- Enquiries with no bill and no idea of consumption
- People who do not own the property and cannot decide
- The same questions answered again every week
- Evening and weekend enquiries, gone cold by the morning
- Conversations scattered across WhatsApp
- And in North Cyprus: an expectation of a kilowatt figure nobody can give

THE SOLUTION

The customer arrives prepared

Zeynah takes the digital side: the questions, the conversation in the customer's own language, the documents, the appointment. Every enquiry that reaches you has been through an Energy Check.

Six languages, around the clock

Turkish, English, Greek, German, Russian, Arabic. An enquiry at 11 pm does not go cold by morning.

Scored and ordered

Energy cost, property suitability, decision authority, intent, timeframe and daytime loads become a score from 0 to 100.

HOW IT WORKS

Nine questions, one conversation, one file

- 1. The customer does the Energy Check — two minutes, nine questions
- 2. They see an honest range: an estimate with its assumptions visible, not a promise
- 3. Zeynah asks for what is missing: the real bill, a roof photo, connection details
- 4. Technical and legal questions are passed straight to you — Zeynah does not answer them
- 5. A person releases the case, and only then does the file reach you

Zeynah does not size systems, quote prices, or promise grants or approvals. That is your work and it stays your work.

Not a name and a phone number

- Location, property type and roof situation
- Actual electricity spend — and the bill itself where it was shared
- Whether they own the property and can decide
- Connection details, as far as the customer knows them
- Daytime loads: pool, air conditioning, EV, heat pump, existing PV
- Timeframe and whether storage is wanted
- Preferred language and the estimate they were shown

One enquiry goes to one partner. It is not sold to three companies at once.

LIVE DASHBOARD

You see your own cases yourself

Every enquiry, its score, its stage and what happened to it. Two views: what Zeynah sees and what you see — because you should know what is passed on about you.

AVERAGE RESPONSE TIME

The dashboard is live and can be shown. It currently runs on sample data, and it says so on screen — there are no real customers yet, and we do not invent them.

We do not give the kilowatt figure

What may be connected depends on the supply, the phase, the transformer, the feeder, the capacity already on the network and a nationwide quota. None of that comes out of a form.

- The Energy Check gives **no kilowatt figure** for the North
- It states plainly that the size follows the KIB-TEK review
- And it collects in advance what that review needs

We checked on 17.08.2026: capacity limits, required documents and deadlines are not clearly published on the KIB-TEK or YEK websites. If someone looking on purpose cannot find them, a customer certainly cannot. That is the gap — and it is your expertise.

RESPONSIBILITIES

Who does what

ZEYNAH

Energy Check and customer acquisition

Conversation in the customer's language,
24/7

Collecting bills and documents

Scoring and prioritising

Appointments and follow-up

Pipeline tracking and reporting

YOU

Site survey

Design and sizing

Electrical work

KIB-TEK / YEK processes

Installation and commissioning

Quote, price, warranty, service

Zeynah is not an installer, gives no engineering or legal advice, and cannot grant any approval itself.

PILOT

No cost to you upfront

- No upfront marketing spend
- No exclusivity demanded
- No lock-in beyond the pilot
- Payment only on a project that actually goes ahead — the rate we agree together

We do not promise you a number of leads. We are new to this market, and anyone naming a monthly figure before running the traffic is guessing. Because we cannot prove volume, we do not ask you to pay for it.

NEXT STEP

A twenty-minute conversation

Which districts you cover, what system sizes suit you, whether you do storage, how fast you can quote — and what a fair arrangement looks like from your side.
